

Ahmed Pervez

Lead Software Engineer

Pakistan (Remote) | needahmed2@gmail.com | needahmed.com | linkedin.com/in/youneedahmed | github.com/needahmed

SUMMARY

Lead Software Engineer with 4+ years building and operating production fintech, SaaS, and AI products end to end. Specializes in multi currency payment infrastructure (ACH, SEPA, SWIFT, and stablecoin settlement) and in shipping complete products solo or in small teams. Deep across TypeScript, React, React Native, Node.js, NestJS, and PostgreSQL, with live payment rails serving the MENA region and a cross platform mobile app delivered single handedly.

EXPERIENCE

Lead Software Engineer, Sorbet

Jan 2026 to Present

Cross border stablecoin payment rails for freelancers and SMEs across the MENA region.

- Own engineering architecture, technical direction, code review, and hiring, while mentoring engineers and introducing new processes and AI agent workflows that raised delivery speed and quality across the team.
- Design, build, and operate a production NestJS payments API powering cross border stablecoin rails, processing \$1M+ in monthly volume across 3 currency corridors at 98% uptime.
- Shipped the Sorbet mobile app solo with React Native, delivering a single codebase for iOS and Android in 4 weeks, covering authentication, KYC, payments, recipients, and transaction history.
- Integrated Bridge and DUE Network to provision USD and EUR virtual accounts and settle via ACH, SEPA, SWIFT, and on chain stablecoin transfers, cutting average settlement time from 2 days to 8 hours.
- Revamped the payments, onboarding, and dashboard flows end to end, increasing transaction volume by 160%.
- Built secure KYC and TOS onboarding, webhook processors, and cryptographic signature verification for financial events, reducing onboarding drop off by 60%.

Senior Software Engineer, VQode

Aug 2024 to Jan 2026

- Led full stack development of Kupi with Next.js, React, and Node.js, serving 3,000 users.
- Designed and shipped scalable web solutions including Location Pro, a SaaS serving 40+ B2B customers.
- Owned end to end database architecture and optimization, cutting page load time by 80%.
- Partnered with design and product to lift engagement by 150%.

Full Stack Developer, Virtury Cloud

Aug 2023 to May 2024

- Built and launched the company website end to end with Next.js, React, and PostgreSQL, improving page load time by 40%.
- Streamlined database workflows and hardened API reliability, reducing API errors by 30%.

PROJECTS

SpellCasters, Real Time Multiplayer Word Game

spellcasters.xyz

- Built a turn based multiplayer word game for up to 6 players with a server authoritative Node and Socket.IO backend validating turn order, path adjacency, scoring, and a gem economy against a 173,000 word dictionary.
- Engineered a React, TypeScript, and Vite client with pointer event drag, live score preview, real time spectating, and tile cascade animations.

OTP Inbox, Gmail OTP Chrome Extension

- Built a Manifest V3 Chrome extension (React 18, Vite, Tailwind) that auto detects and surfaces OTP and verification codes from Gmail.
- Engineered a Node, Express, Prisma, and Redis backend with Google OAuth, AES 256 GCM token encryption at rest, and a phased move from polling to Google Cloud Pub/Sub for sub second push, secured with a read only scope and per user rate limiting.

KUPI, WhatsApp AI Chatbot

- Led end to end creation of a WhatsApp AI chatbot using Node.js and OpenAI to automate ticket inquiries and bookings, integrating Twilio for messaging and deploying via the Serverless Framework on AWS.

Fintech Morning Briefing, AI Content Pipeline

- Built a Node.js CLI that ingests fintech, stablecoin, and MENA RSS feeds, scores each item with the Kimi K2 model, and writes high signal picks to a Notion database, with deduplication and per run cost controls.

SkillSprint, Career Guidance Platform

- Co founded and built a career guidance platform with interactive computer science roadmaps using Next.js 14 and TypeScript, including a recommendation tool powered by a random forest classifier.

SKILLS

Languages: TypeScript, JavaScript, Python, Solidity, Rust

Frontend: React, Next.js, React Native, Angular, Vue, Vite, TailwindCSS, Framer Motion, shadcn/ui, Material UI

Backend: Node.js, NestJS, Express.js, FastAPI, Django, REST APIs, GraphQL, WebSockets, Socket.IO

Databases and Storage: PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM, Supabase, Azure Blob Storage

Cloud and DevOps: AWS (Lambda, S3, EC2), Google Cloud, Azure, Docker, Serverless Framework, Vercel, Netlify, Railway, CI/CD, GitHub Actions

AI and Machine Learning: OpenAI API, LangChain, RAG, Scikit learn, Pandas, NumPy, TensorFlow, prompt engineering

Payments and Fintech: ACH, SEPA, SWIFT, KYC and TOS flows, virtual accounts, Bridge, DUE Network, webhook and signature verification, stablecoin settlement

Blockchain: Solidity, Rust, ethers.js, Hardhat

EDUCATION

Bachelor of Computer Science, Bahria University

CERTIFICATIONS

- Web Development Bootcamp, Udemy
- Ethereum Development Bootcamp, Alchemy University
- Solana Development Bootcamp, Udemy
